QUIK STIKS & PAINT MARKERS

The Quik Stik® Mini is a compact solid paint marker in a convenient twist-up, plastic holder that is ideal for finer line marking on smooth or rough surfaces. This smaller version of the Markal® Quik Stik stores easily in a pocket or tool belt and easily advances with the turn of a knob, allowing for full use of the marker. The high-performance paint dries quickly to leave bold, permanent marks on most surfaces.

- Fast-drying, vibrant paint marks dry in 5 to 7 minutes for fast and easy use, allowing users to work faster and more efficiently.
- Compact plastic holder with clip-cap stores easily in pocket and keeps hands and clothing clean allowing users to keep the markers on hand for quick and convenient use which saves time and money.
- Marks on virtually any surface; metal, glass, plastic, wood, cardboard, paper, etc... - even marks on wet, smooth, rough, or hot – make these super versatile eliminating the need to carry multiple markers.
- Durable, lead-free paint is weather- and UV-resistant for long-lasting marks that are easier to read and don't require multiple applications saving users time and money.
- Solid paint marker advances and retracts by turning twist-up knob for a more convenient and cleaner application compared to messy sticks – allowing users to mark with better precision and without mess – eliminates peeling off paper wrappers and no cleanup required.
- Xylene, 2-Butoxyethanol and lead-free formula reduces health risks, environmental and waste disposal concerns.
- Marking range: 0°F to 392°F (-18°C to 200°C)
