COUPLER BLOW GUN COMBO

An innovative combination quick coupling and blow gun in one! This convenient unit is perfect for metalworking or woodworking operations, which often produce shavings or sawdust making it difficult to view the work surface. A quick burst or two from the **Coupler Blow Gun Combo** allows the operator to get back to work quickly and easily without having to disconnect the tool, connect a dedicated blowgun and then reconnect the tool. The **Coupler Blow Gun Combo** can be used with an air tool connected or disconnected and is currently available in our most popular 1/4-inch Industrial Interchange.

- **Integrated with the coupler that is already attached to your hose** and therefore always ready to use – means the user can quickly clean off a workspace without changing tools.
- **Easy push button trigger** located right at the base of the coupler for quick and easy activation saving users time and money.
- **The blowgun portion is isolated behind the coupler** allowing the blow gun mechanism to be used with a tool connected or disconnected for convenient use anytime.
- **Max working pressure:** 120 psi
- 1/4" Industrial with 1/4" female NPT
