

SAVE UP TO 21%

ON PROFESSIONAL GRADE INDEXING PRY BARS!

IDEAL FOR

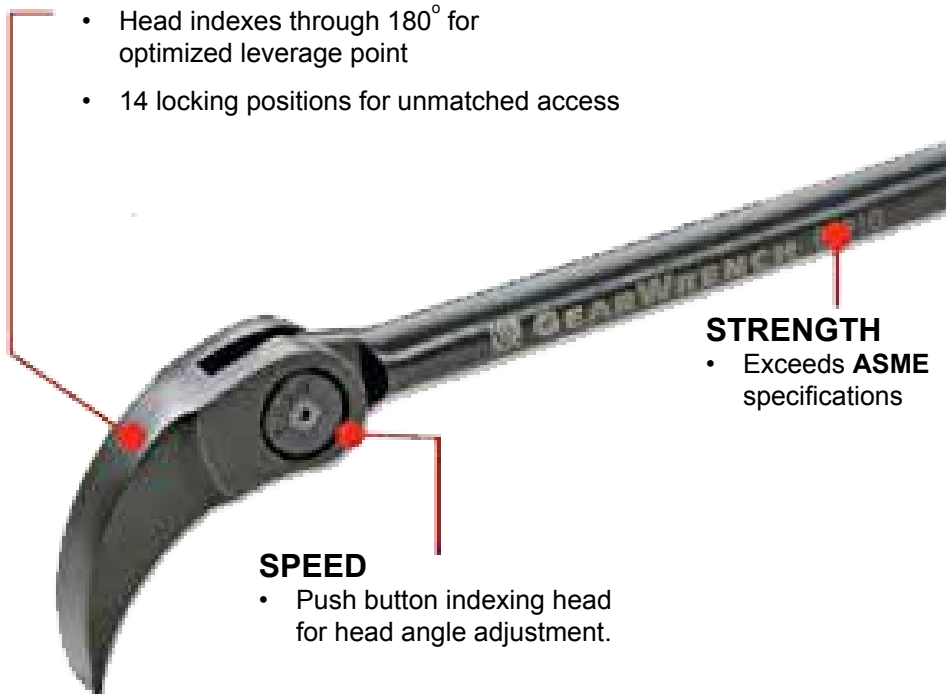

- Engine & heavy equipment repositioning and placement
- Aligning steel components
- Designed to meet or exceed ASME expectations.

Designed to improve access in tight applications, the head of the pry bars can be adjusted to 14 different positions, offering more than 180° of angle. The innovative indexing feature allows the user to gain more leverage. The 8" Indexing Pry Bar can also function as a seal pick for removing engine and axle drive seals. In addition to the fixed length Indexing Pry Bars, two expandable versions are available that extend from 18" to 29" or 29" to 48".

ACCESS

- Head indexes through 180° for optimized leverage point
- 14 locking positions for unmatched access

STRENGTH

- Exceeds ASME specifications

SPEED

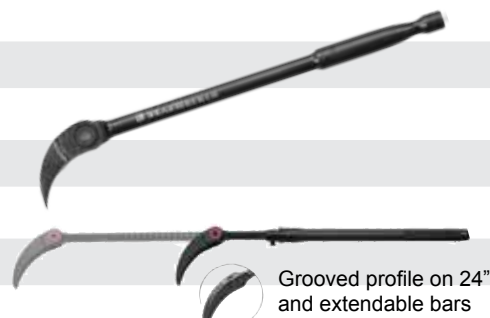

- Push button indexing head for head angle adjustment.

- Collapses to easily store in a tool box.

- 18" - 29" or 29" - 48" with push button to adjust reach.
