## M42 THIN WALL HOLE SAWS

- **INNOVATIVE DESIGN** Impact rated hole cutter makes these far more aggressive at cutting sheet metal and other thin metals. Rated for impact tools and coupled with the thin wall these cut many times faster than a standard hole saw or special sheet metal cutter.
- **1/4" HEX SHANK QUICK CHANGE VERSATILITY** Can be used with a wide range of air, corded or cordless tools, including impact tools. Can be used with hex shank adapters, quick releases and extensions.
- **THIN WALL** the thin wall 8TPI design makes hole saws cut extremely fast compared to other hole saws that have to remove more material due to the thicker wall design. They leave a burr-free cut that is faster and cleaner than standard bi-metal hole saws
- **M42 BI-METAL WITH 8% COBALT** has increased wear resistance and added tooth strength and is ideal for steel and metal cutting applications. Highly resistant to wear or breakage, so it stays sharp longer and provides fast cutting over a long life.
- **BUILT IN PILOT DRILL** for immediate slug ejection makes slug removal fast, effortless, and improves productivity.
- **STOP SHOULDER DESIGN** has a built in collar to prevent the saw from over-drilling or popping through the work — preventing damage to things like electrical wires and components when drilling through existing panels or in service equipment.

## INTRODUCING THE NEW TRADE-A-BLADE™ SYSTEM

Our Trade-a-Blade™ system is simple! The Trade-a-Blade™ system rewards our users by giving them a 'Trade Credit' toward the purchase of another Trade-a-Blade™ product. This is an easy and a cost effective way for customers to save money.

Receive a \$4 credit toward the purchase of a new M42 Thin Wall Hole Saw when turning in a used one.

Limit - One \$4 credit for each new M42 Thin Wall Hole Saw purchased.

The used M42 Thin Wall Hole Saws can be turned into your sales person for credit when placing an order for a new one. The \$4 credit will be reflected on the invoice with the new M42 Thin Wall Hole Saws.
