

# CHOOSE AN OFFER — SAVE UP TO 27%! POLYURETHANE STRAPS

- **Industrial grade polyurethane** rope (no cloth or elastic) **will not break, rot, or become brittle** like rubber or cloth maintains its stretch even under extreme conditions for a safer and longer lasting strap — saving time and money.
- **Polyurethane has a long, safe stretch of 2 times its length** for a superior reach and hold for all tie down and strapping needs — requiring fewer lengths, reducing inventory and storage of a variety of strap lengths.
- **Polyurethane has better performance under extreme weather conditions** such as UV, hot and cold temp variations, water, ozone than rubber and cloth — even performs when exposed to diesel fuel, oil and most household chemicals — making this a superior cord for all areas — saving time and money.
- **Fixed strap lengths** are made with **fiberglass-filled nylon hooks** that are over molded into cord for **superior performance and durability** with the same **2X the stretch** and a hook break rating of 180 lbs. for maximum safety — keeping workers safe from snap back and injury.
- **Molded-on nylon end hooks** won't mar or scratch like metal hooks — providing a strap that is safer to use on all materials, keeping vehicles and other areas where straps are used safe from damage.
- **Made in the USA.**
- **Won't break, crack or become brittle.**
- **They retain their color**
- **Never lose their strength and never lose their stretch, stretching up to twice their original length.**
