

Hub & Stud Cleaning Made Easy - Save 26%

Hub & Stud Cleaning Discs and holder combine an **abrasive 3-D construction** with a unique, center hole Roloc™ attachment system for improved productivity. This compact system removes rust and corrosion quickly, even in hard-to-reach places.

- **Extremely tough three dimensional web** removes rust and corrosion without excessive metal removal or gouging of the material. Saves time and protects AOEM surface milling marks.
- **Non-metallic attachment system** and disc pad holder are made of **tough polymers** that will not damage wheel threads.
- **Roloc attachment system** locks securely with 1/2-turn on and off function that fits over the wheel stud. Fast and efficient; saves time and money.
- Ideal for use on right angle air tools.
- Contains **no wire filaments**; eliminates the potential for injury from flying wires for safer operation.
