

SPLIT BRAIDED SLEEVING FOR BETTER BUNDLING

Split Braided Sleeving

1/4" x 75'	IBS No. 19040
3/8" x 75'	IBS No. 19041
1/2" x 50'	IBS No. 19042
3/4" x 50'	IBS No. 19043
1" x 50"	IBS No. 19044

Features & Benefits

- **Retains shape & rigidity** from -94°F to 257°F.
- **Unique split, semi-rigid construction**; ideal for installation.
- **Lateral split** accommodates a wide variety of bundling requirements.
- **Semi-Rigid braid** closes around the entire installation without any additional fasteners.
- **10 mil Polyethylene braid** is quiet, lightweight & flexible.
- **25% edge overlap** allows for coverage around inline plugs, splices & connectors.
- **More flexible than Split Convolute or Spiral Wrap**: bends in tight radius & **won't distort or split open**.
- **Won't impair the flexibility of harnesses**.
- Allows for **addition or removal of wires without disassembly**.

FREE Installation Tool
With any purchase of any roll- up to a \$13 value!

1. Insert your wire bundle into the shank.
2. Slide the tool along the split in the sleeving.
3. Watch as the tool despositis the wires and closes the split.
