One-Touch Safety Push Button Air Couplers

One-Touch Safety Push Button Air Couplings meet the top level of quality standards required in the professional industry for quick and effortless coupling.

- **One push control** to decompress the system and disconnect in complete safety: eliminates hose whip to protect the user, surrounding tools and equipment.
- **Silicone free** manufacturing: avoids the risk of contaminating compressed air during the paint or varnish applications which can cause surface imperfections.
- **Functionally designed** to allow a natural grip and easy handling.
- **Composite body material:** anti-scratch body material also allows user to create a firm grip on the coupling.
- **Compact and lightweight** coupling for maximum user comfort when handling repetitively. Provides accuracy and increases work station efficiency.
- Resistant to abrasion, vibrations, corrosion, impacts and crushing: **reinforced composite body** is capable of withstanding the harsh conditions frequently found in production environments.
- **Color coded buttons** make the selection of profiles easy to identify: this system reduces the risk of connection errors which may cause damages or accidents.
