

MAKING BIG HOLES IS EASY

UP TO 33% OFF REDUCED SHANK DRILL SETS

NITRO-CARB

- **Heavy Duty Hi-Molybdenum** tool steel construction produces a harder, more work resistant bit for longer cutting life.
- **135° Split Point:**
 - Takes a smaller chip, uses less torque and minimizes heat build-up for longer life.
 - Provides accurate starting & self-centering, eliminating the need for a center punch or pilot hole.
- **Black treated margins** provide a free flow of chips and protect the cutting edge from heat abrasion so drills last longer when drilling tough materials like stainless steel.
- **3 flats on shank** insures positive chucking without slippage.
- **Designed for use in work hardening grades of stainless steel & other hard metal drilling applications.**
- **MRO = 5" OAL, Jobbers Length = 6" OAL**

NITRO-X

- **Unique step tip design** rapidly reams the hole as it penetrates for a faster, cooler cutting action — **up to 50% faster than standard drill bits** — saving time and money!
- **Eliminates the need to drill starter pilot holes** before making larger hole sizes.
- **Micro 135° Split Point** provides accurate starting & self-centering, eliminating the need for a center punch or pilot hole.
- **Three flats on shank reduces slippage** for superior hold, even in hand held operations.
- **Gold surface treated** for added lubricity.
- **MADE IN THE U.S.A.!**

FREE STAND (\$49 VALUE) WITH PURCHASE OF ANY (3) REDUCED SHANK DRILL BITS

33 Pc NITRO-CARB DRILL STAND
