APOCALYPSE BRONZE

BRONZE: 143024 – CASE QTY: 12

APOCALYPSE
MULTIPLE LENS COLORS
CASE QTY: 12 143021- 143024

- **Superior Contrast and Detail Definition:** Snow reflects a tremendous amount of blue light, which creates an optical “haze” and causes blurriness. Bronze lenses naturally filter out blue light. By cutting down the blue spectrum, they significantly amplify shadow definition.
- **Sharper Depth Perception:** The contrast-boosting properties of a bronze base tint expand your depth perception, giving you a truer sense of the terrain’s actual shape and layout.
- **Glare and Eye Fatigue Reduction:** The snow acts as a massive mirror, reflecting up to 80% of UV rays and blinding ambient sunlight. Bronze lenses provide substantial shade without turning your vision completely dark and lifeless, allowing your eyes to stay relaxed and preventing strain over hours of work.
